

ENVIRONMENTAL STATEMENT

TIMBER

VER: 1.0

AT HUME WE EMBRACE ENVIRONMENTAL AWARENESS, PROTECTION AND ENHANCEMENT

Timber is a fully sustainable resource that is non-toxic, reusable and versatile. The continued growth and planting of forests aid in the reduction of carbon dioxide. The future of our products, business, industry and customer satisfaction is directly linked to the sustainable management of the world's forests.

Our manufacturing and distribution processes have been designed to minimise our environmental footprint by, among other things:

- ✓ Utilising energy to its maximum efficiency
- ✓ Subscribing to renewable energy sources (where possible)
- ✓ Utilising recycled product (where possible)
- ✓ Organising our transportation routes to minimise energy requirements of our vehicle fleet
- ✓ Providing reliable, long lasting products
- ✓ Ensuring our suppliers of raw material products are accredited by appropriate independent, third party environmental stewardship programs including FSC (Forest Stewardship Council), PEFC (Programme for the Endorsement of Forest Certification Schemes), AFS (Australian Forestry Standard), etc and hold to the principles and guidelines contained within these programs.
