

WHAT IS PINETRIM^{XT} H3 L.O.S.P PRIMED?

TIMBER

VER: 2.0

Pinetrim^{XT} H3 L.O.S.P Primed biologically treated pine has been impregnated with a chemical solution containing two components; fungicide and insecticide. Preservatives are forced deeply into the timber, treating the pine to give long term resistance to decay, insects and other wood destroying organisms. This effective and lasting protection of pine enables it to be used in many applications outliving untreated and naturally durable timbers in exposed conditions.
