Hume Doors & Timber is committed to operating its entire business processes in an environmentally sustainable manner at all times. We embrace environmental awareness, protection and enhancement. Our goal is to be regarded as an environmentally responsible corporate citizen that practices environmental stewardship and provides our valued customer base with complete confidence that our products have been produced in accordance with applicable independent environmental standards.

- Hume Solar Power Scheme - Reducing our carbon footprint
- Reusing and recycling by-products, packaging and waste material
- Reducing the level of packaging and consumables used
- Capturing, storing and using rainwater for our water needs
- Maximise transport loads, thus reducing energy requirements

Hume Doors & Timber (Qld) Pty Ltd is also a certified member of the Forest Stewardship Council® (SGS-CoC-009405).

Hume Doors & Timber (Aust) Pty Ltd is a certified member of the Forest Stewardship Council® (SGS-PEFC/CoC-1532).

Hume Doors & Timber has extensively tested its comprehensive range of doors and door frame systems, which include both hinged and pivoted entry frame systems up to 2700 x 1200, to meet the AS1530.8.1 criteria set for buildings in BAL (Bushfire Attack Level) zoned areas without compromising on functionality and aesthetics.

Look out for our BAL symbol throughout our Catalogue for compliance. Doors must be installed as per AS3959-2009 to conform to BAL (Bushfire Attack Level) compliance. Refer to our website for further information: www.humedoors.com.au

Hume Doors & Timber has extensively sound tested its comprehensive range of doors. Sound Transmission Class (STC) tested to ASTM E 413-87 and Acoustic Weighted Reduction (Rw) tested to ISO 717-1.

Look out for our sound rating symbol throughout our Catalogue. To achieve the rating doors must be installed with seals of equivalent RW/STC and must be installed as per the seal manufactures recommendations. Refer to our website for further information; www.humedoors.com.au

Trend doors have unique carved patterns on both sides of the door together with dense premium door faces. Non solid construction.
The Brunswick is a range of pre-primed moulded panel solid entrance doors for application in moisture protected situations only. Woodgrain or smooth skin depending on the model. Design both sides.

SHUTTER SLIDERS
Venetian features magnetic finger sliders for easy operation:
(A) Tilt adjustments slider
(B) Raise and lower operations.

The Venetian is a fully functional integrated blind system that lets you make the choice between light and dark without any of the cleaning and maintenance hassles of conventional blinds. Fully functional blinds tilt, raise and lower via magnetically driven finger tip controls. The Venetian is encompassed between two pieces of tempered safety glass removing the need for cleaning.
The Lincoln range is the ideal match to traditional architecture or that executive fashioned residence. Crafted from select timbers, this range features an engineered joinery construction system, which utilises traditional joinery methods as well as incorporating modern techniques.

The Carringbush is a recreation of doors from the Victorian era. These doors incorporate routed designs each side and have the warmth of detailed timber mouldings, strong cricket bat panels, ledge and scroll on the exterior door face.

The Lincoln range is the ideal match to traditional architecture or that executive fashioned residence. Crafted from select timbers, this range features an engineered joinery construction system, which utilises traditional joinery methods as well as incorporating modern techniques.
SUBTLE & STYLISH

The Nexus range is designed with urban architecture in mind. These smart designs are the perfect link between the cityscape and your home. The array of glass options provides limitless choices for you to create the urban look.

CAVITY UNIT

EVOLUTION PREMIUM

Floor to Ceiling Cavity Unit
- IMPRESSIVE large door openings
- Virtually invisible - hidden track system
- Soft closer - prevents door slamming
- One touch operation - push to release door

The Evolution Premium cavity unit is a floor to ceiling, zero clearance sliding door system. Hume Doors have designed the cavity unit to enable the track to finish flush with the ceiling, allowing for impressive full size openings to be achieved with a minimal gap between the door, floor and ceiling.

For more information visit www.humedoors.com.au/door-systems

CAVITY DOOR STOP

For double cavity application

CAVITY UNIT INSTALLATION

EVOLUTION STEEL

Premium Metal Cavity Unit
- Top of the range with galvanised steel back posts slats and track - termite proof
- Smooth 4 wheel ball bearing carriages
- Jump free U track - smooth operation
- Maximum door mass 70kg
- Quick release mechanism to easily remove door for painting or modification

EVOLUTION

Timber Deluxe Cavity Unit
Available in plain or treated timber
- Same architrave height as a hinged door
- Smooth 4 wheel ball bearing carriages
- Jump free U track - smooth operation
- Maximum door mass 70kg
- Quick release mechanism to easily remove door for painting or modification

EVOLUTION TOUCH

One Touch Cavity Release System
- Holds door flush in cavity
- One touch to release door
- Effortless operation
- Perfect for the Evolution cavity range

EVOLUTION TIMBER CAVITY UNIT OPENING SIZES

Note: Unit size is tight; please allow extra for packing when preparing the opening.

A = Door height + 70mm (QLD. SA. TAS. WA)
A = Door height + 80mm (NSW. VIC. ACT)
B - Opening width for Flush pull = 2 x Door + 10mm (Flush pull the door protrudes 50mm)
B - Opening width for Flush jamb = 2 x Door + 60mm (Flush jamb the door is flush with split jamb)

DOOR PRODUCTS

At Hume Doors & Timber we manufacture doors for a multitude of applications and your State office will gladly accept your enquiry no matter how large or small.

As a guide, we provide the following:

AIR GRILLS
- Aluminium
- Snap in

ALUMINIUM T-BARS

METAL CLAD DOORS
- Zinc
- Colorbond

FIRE DOORS

1HR, 2HR, 3HR, 4HR

- Incorporate TVC Core
- Full metal inner plates for hinge locations, closer and lock
- Choice of face materials: MDF, ply, tempered hardboard

GLAZED PANELS
- Suit Firedoors
- Panel Sizes: 600x100, 300x200 or 450x120

STEEL DOOR FRAMES

- 3 Hinges (required to meet door manufacturer’s guarantee for solid doors)
- Hinges screw fixed to frame to allow removal if required for easy door hanging
- Simple installation
- Ready for priming or painting
- Zinc finish

All components supplied for brick/block and partition walls

Left or right hand available
Subject to terms and conditions set forth herein, steel door frames manufactured and/or supplied by: Hume Doors & Timber (SA) Pty. Ltd., Hume Doors & Timber (Qld) Pty. Ltd., Hume Doors & Timber (Vic) Pty. Ltd., Hume Doors & Timber (WA) Pty. Ltd. or Hume Doors & Timber (NSW) Pty. Ltd. (hereinafter referred to as “the Company”) are warranted by the manufacturer and/or supplier for one year from the date of shipment by the manufacturer and/or supplier to be of good material and workmanship, free from defects which would render them unserviceable or unfit for the use for which they were manufactured.

THE COMPANY WARRANTS:
1. Goods manufactured and/or supplied for a period of one (1) year as from the date of shipment, to be free from defects in material and workmanship which would render them unserviceable or unfit for normal use.
2. To the extent permitted by law or the express provision of any statute or otherwise hereby expressly excluded and in respect warrants that cannot be so excluded, these terms and conditions shall be read such that those statutory warranties are read as being in additional to the warranties hereby given.
3. Subject to Clause 2, the warranty in Clause 1 shall be read subject to the following matters being excluded as defects:
   a. Defects caused by improper storage or adverse moisture conditions after doors leave the premises of the manufacturer.
   b. Usage, damage or defects arising out of, or in connection with, shipment, or storage or installation of doors in conditions or hazards of shipment or storage after doors leave the premises of the manufacturer.
   c. Improper storage or adverse moisture conditions after doors leave the premises of the manufacturer.
   d. Harsh chemicals used during the installation of doors.
   e. Warping exceeding 5mm for doors up to 2100 x 920mm, 6mm for doors over 2100 x 920mm and up to 2340 x 920mm and 8mm for doors over 2340 x 1200mm.

TERMS AND CONDITIONS
Natural variations in the colour, texture or grain pattern of the wood or MDF are not to be considered defects. Doors must be accorded reasonable treatment by the purchaser and should be stored or hung in dry buildings and not in damp, moist or freshly plastered areas. The utility or structural strength must not be impaired in the fitting of the door, the application of hardware, or cutting and altering of the door for lights, louvres, panels or any special details. A maximum of 3mm may be trimmed from any edge of the door. This must be done evenly. Normal “show-through” of frame components in doors shall not be considered a defect.

3.1 Frames not accorded reasonable treatment by the customer.
3.2 Damage or defects arising out of or in connection with, shipment or storage after frames leave the control of the company (i.e. delivered to site or handed over to a carrier). Frames must be inspected by the customer for visible defects immediately upon delivery.
3.3 Claims for non conforming deliveries (incomplete defective or incorrectly supplied) will only be considered if made within 3 working days of receipt or delivery of Frames. All delivery checks are the responsibility of the customer.
3.4 Under NO circumstance will the company be liable if frames are installed before checking that they are supplied correctly and are free from defects.
3.5 Factory priming is only to protect frames in transport and general handling it is the responsibility of the customer to immediately on delivery of all frames apply 2 coats of compatible sealing priming to ensure corrosion or the like does not occur.
3.6 It is the responsibility of the installer to ensure that the frames are installed plumb, square and suitably anchored using the correct fixing points.
3.7 Storage and security of the frames is not the responsibility of the company.
3.8 Stainless steel hinges are required to be maintained every 2 months to ensure prevention of tarnishing and corrosion.

Our products come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Subject to terms and conditions set forth herein, doors manufactured by: Hume Doors & Timber (Aust) Pty. Ltd., Hume Doors & Timber (Qld) Pty. Ltd., Hume Doors & Timber (Vic) Pty. Ltd., Hume Doors & Timber (SA) Pty. Ltd. or Hume Doors & Timber (WA) Pty. Ltd. (hereinafter referred to as “the Company”) are guaranteed by the manufacturer for five years from the date of shipment by the manufacturer to be of good material and workmanship, free from defects which would render them unserviceable or unfit for the use for which they were manufactured.

EXCLUSIONS
   a. Doors with face veneers of different species.
   b. Doors that are improperly hung or do not swing freely.
   c. External flush doors which have been painted or stained dark colours, or different colours each face.

Company will not be liable to the customer for the Company’s failure to comply with its obligations to the customer due to any cause beyond the Company’s reasonable control and the Company’s obligations affected by such cause are suspended while the cause continues to prevent or hinder the Company’s performance.

ADVISORY NOTE
Considerable damage can occur during the delivery of doors particularly to country areas. “Special Packaging” is recommended (optional extra cost) in an attempt to prevent transit damage. The Company is not responsible for any transit damage.

INTERPRETATION OF WARP
Warp shall be interpreted as meaning the cupping/bowing or twisting of doors. It refers to distortion within the door itself and not its relationship to the jambs or frame in which it is hung. Warp exceeding 5mm for doors up to 2100 x 920mm, 6mm for doors over 2100 x 920mm and up to 2340 x 920mm and 8mm for doors over 2340 x 1200mm shall be considered a defect. Doors in excess of 2340mm high or 1200mm wide are not guaranteed against warp.

EXCLUSIONS
The guarantee against warp does not apply to the following:
   a. Doors with face veneers of different species.
   b. Doors that are improperly hung or do not swing freely.
   c. External flush doors which have been painted or stained dark colours, or different colours each face.

Experience has demonstrated that when warp occurs after doors have been delivered to storage or building sites, it is usually due to improper storage or adverse moisture conditions after hanging and not to faulty manufacture. The Company will accept no responsibility for doors when moisture content of the timber falls below 12% or exceeds 18%. The Company will not accept responsibility for conditions wholly beyond its control. However, the Company should be consulted promptly if excessive warping occurs to provide assistance in overcoming the difficulty.
CARE & MAINTENANCE

1. After selecting and purchasing your Hume door, store flat in a dry, well ventilated area prior to installation.

2. Your timber door may be affected by changes in temperature, moisture and location.

3. Before fitting the door, all six door surfaces should be sealed initially then after installation painted, stained or clear finished with good quality products. Follow the paint manufacturer’s instructions with the correct number of coats on ALL surfaces.

4. Light reflective colours are recommended for Entrance Doors to reduce the possibility of bow, twist or warp. Dark colours may void Hume guarantee. Semi gloss finishes are recommended. Paint with a light reflectance value (LRV) finish greater than 50 should be used on External Doors. White – LRV approx 95, Black – LRV approx 5.

5. Use the same colour on all six door surfaces. Different colours may cause doors to warp.

6. Entrance Doors require overhead protection (above).

7. Location and fitting of your door furniture depends on door construction. Honeycomb core doors have a lock block (piece of timber) located generally on the side with the Hume label and door furniture should be fitted in this location. Solid doors may have door furniture installed at any selected height, either side of door.

8. Door maintenance is necessary for long term performance and periodic inspections are recommended. At the first signs of deterioration, your door should be properly refinished, making sure that all bottom surfaces of the door receive proper resealing and painting.

9. To clean your door, use a damp cloth. Do not hose or use chemicals or abrasives on your door. Lightly oil hinges and door furniture for optimum performance.

Contact your nearest Hume Doors stockist or the Hume Doors website for more information.
Hume Doors & Timber reserves the right to alter or amend without prior notice data, dimensions and design details specified herein.
Photographs or illustrations may not exactly depict the design or specification and may vary to actual. Doors are supplied unfinished unless otherwise specified and all routed doors have exposed MDF.
