

# FSC® & PEFC™ CERTIFICATION

## ENVIRONMENTAL

VER: 2.0

Hume Doors & Timber is PEFC and/or FSC Chain of Custody certified and certified material in the products are traceable to certified sources.

The mission of FSC is to support environmentally appropriate, socially beneficial, and economically viable management of the world's forests. PEFC are committed to conserving forests and their invaluable biodiversity, and the communities and families that own, work and live in and around forests.

Paper honeycomb core is manufactured from 97-98% recycled pulp (predominantly cellulose), or post consumer reclaimed old corrugated cardboard (OCC) materials.

Environmentally appropriate forest management ensures that the harvest of timber and non-timber products maintains the forest's biodiversity, productivity and ecological processes.

Our major door components have the following environmental footprint:

- ✓ Door faces, infills, stiles, rails and lock blocks are FSC certified. Ask for our FSC Certified product range
- ✓ Material is sourced from ISO 14001 certified companies
- ✓ PEFC certified products are also available

Socially beneficial forest management helps both local people and society at large to enjoy long term benefits and also provides strong incentives to local people to sustain the forest resources and adhere to long-term management plans.

Economically viable forest management means that forest operations are structured and managed so as to be sufficiently profitable, without generating financial profit at the expense of the forest resources, the ecosystem or affected communities. The tension between the need to generate adequate financial returns and the principles of responsible forest operations can be reduced through efforts to market forest products for their best value.

Hume Doors will not use, manufacture or market any product or service unless we have total satisfaction that it can be achieved safely and in an environmentally sustainable manner.

Hume Doors & Timber use adhesives that have been formally tested for formaldehyde emissions and Volatile Organic Compounds (VOC) as recommended by the Green Building Council.

FSC certified inputs are exclusively used when manufacturing FSC certified products.

#### **PEFC™ CERTIFICATION**
